#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by Tsutsumi et al. (U.S. 5,629,632).

Regarding claim 1, Tsutsumi et al. disclose in Fig. 1, an electronic device testing apparatus (Figs 1-2) for conducting a test by pressing via push mechanism 24 (column 5, lines 52-65) and moving means (column 5, lines 45-51) comprising test head 20-21 on an electronic device conveying medium via conveying tray 11 (column 4, lines 35-50), a plurality of contact groups 18A and 19A (column 4, lines 10-30); and a moving means capable of independently controlling electronic device conveying medium loaded with electronic devices to be tested to contacts (column 4, lines 35-65).

Regarding claim 2, Tsutsumi et al. disclose in Figs. 15 electronic device conveying medium 11A-11D loaded with electronic devices D to be tested is a strip format (DUT D arranged in columns and rows see Fig. 1).

#### Allowable Subject Matter

3. Claims 3-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: claims 3-10 recite, inter alia, "a control means for finishing tests with the shortest time on remaining electronic devices to be tested on electronic device conveying medium when a lot of electronic devices to be tested finishes." The art of record does not disclose the above limitations, nor would it be obvious to modify the art of record so as to include the above limitations.

### Response to Arguments

4. Applicant's arguments with respect to claims 1-2 have been considered but are moot in view of the new ground(s) of rejection.

#### Conclusion

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
